SCOPE OF SERVICES**

List of Tasks:

The following is the minimum requirements that the consultant is expected, but not limited, to incorporate into the proposed scope of services. The tasks enumerated below are not intended to be comprehensive nor are they assumed to be the only tasks required to complete the project as each consultant firm is expected to develop its unique, comprehensive and detailed scope of services, based on its expertise and knowledge of similar projects, necessary to meet the City’s expectations for completing the project.

1. **PROJECT MANAGEMENT:** Establish and identify the project team to consist of consultant’s project manager and additional personnel. This team will regularly meet with City staff to evaluate progress and ensure the project is being performed in accordance with project goals, expectations, and schedule.

2. **DOCUMENT REVIEW:** Review existing plans, documents, and other reports for use in the assessment. The City has identified the following documents that should be used as part of the assessment and will be provided to the consultant in electronic format:

3. **DATA COLLECTION:** Conduct park and facility site visits with City staff to document and inventory site amenities and assess existing conditions. Exhibit 1 provides a preliminary list of parks and facilities to be included in the assessment.

4. **CRITERIA DEVELOPMENT:**
 - Consultant will develop qualitative criteria/formula for a park and amenity grading system to help in equipment and capital replacement prioritization. The formula should consider, but not be limited to, factors such as:
 - Physical condition of equipment (i.e., good, fair, poor, etc.)
 - Quantity of equipment available per acre or park
 - Park type (regional, community, neighborhood or pocket) and population density in proximity to the park
 - Current equipment standards and equipment age (estimated useful life)
 - Community importance/desired level of service
 - Consultant shall develop a condition scale to be used in the assessment of equipment. The scale must include documentation on assessment methodology, including photos, to maintain consistency between proposed and future evaluations. For example, Consultant must document examples of equipment in (1) poor, (2) fair, (3) good, or (4) excellent condition. The scale should be effective in calculating an overall park grade.
 - Consultant will provide an Estimated Useful Life (EUL) for each equipment class and subclass, if necessary, to plan for future replacement. The EUL should be based on a combination of industry standards, benchmarks, environmental factors, and levels of use.
 - The Consultant will document equipment models that exist in the field and will work with

City staff toward standardization for future replacement of equipment based on past performance, durability, cost, and maintenance requirements.
