On an as-needed basis, Consultant shall provide professional engineering services to perform various tasks, including but not limited to:

- create, maintain, and support a standard technical specifications library;
- create and edit technical specifications for specific projects;
- create, maintain, and support a construction cost estimating tool sufficiently accurate for use in preparing budgeting and construction cost estimates at project bidding and prepare construction cost estimates for specific projects;
- prepare scopes of work for Requests for Proposals to solicit professional engineering services;
- provide peer review, constructability review, and design review of studies, preliminary designs, final designs, and construction drawings;
- provide structural and mechanical designs and calculations, and
- provide project management and professional engineering support for a variety of water and water reclamation projects.

The City will identify specific projects and tasks to be performed by Consultant throughout the term of the Agreement. Upon award of specific work by release purchase order, Consultant shall complete the work within the schedule provided by the City. Such time requirement will vary greatly depending on the size and complexity of the project or task. Consultant agrees to abide by any proposal or work deadlines required by the City, and Consultant agrees that failure to meet such deadlines, or failure to respond to project solicitations may result in termination of Consultant's Agreement.

Services typically needed by the City include, but are not limited to, the following list:

### **A. Standard Specifications in Construction Specification Institute (CSI) Format**

The City desires to develop and maintain a library of standard technical specifications in Construction Specification Institute (CSI) format providing the following benefits:

1. Provide consistency in equipment, materials, and quality requirements from project to project for City staff, consultants, construction managers, inspectors, contractors, and vendors.
2. Document the City's equipment, materials, and procedural preferences in a common location to facilitate revisions when preferences or standards change.
3. Provide clear options and decision points for City staff and design consultants to identify project specific requirements.
4. Provide a central library of information enabling City staff to access current standards and engineering policies.

5. Provide a library of City-approved specifications to consultants to reduce consultants' time needed to prepare specifications tailored to City needs.
6. Provide products and workmanship requirements in a tabular format which simplifies and facilitates the effort to locate information and understand the specification requirements.
7. Reduce City staff time verifying consultant-issued specifications have been tailored to City needs.
8. Minimize City staff time locating edits to standard specifications by consultants.
9. Reduce contractor bidding errors through communicating City's project requirements in a logical, consistent and industry-adopted CSI-based format.
10. Provide City inspectors with clear specifications which are consistent from job to job and easier to enforce.
11. Facilitate City updates to specifications to accommodate changes to building code, products, laws, regulations, and practices.
12. Provide a library of specifications documenting experience from a variety of projects and consultants within and outside the City of Corona.

The City has substantially completed a library of CSI master specifications Divisions 1-46 using the 2010 six-digit numbering system and is now using these master specifications on a regular basis. The City wishes to develop additional specifications as needed and maintain and improve the existing master set as opportunities to do so become available. Technical Specifications will include a sufficient level of detail and information to clearly identify the following:

- General Items
  - A description of Work included in each specification section.
  - A list of specifications covering related Work.
  - Where applicable, a description of the overall system being specified, including an overview of any desired control strategies and setpoints.
  - Applicable quality assurance provisions.
  - A tabulation of factory testing required for compliance.
  - A listing of applicable Reference Specifications.
  - A tabulation of required submittal items.
  - A summary of delivery, storage, and handling requirements.
  - A description of how measurement and payment will occur.
- Products (or Materials)
  - Provision for an overview of general project-specific design exposures and conditions including properties and temperatures of fluids or materials handled, and applicable soils conditions.
  - A tabulation of acceptable manufacturers with contact information
  - A tabulation of desired materials and applicable specifications

- A tabulation of design options available with notes and guidance for use by project designers
- For pipe products, tabulations of pipe requirements, joint and gasket requirements, and fitting requirements as applicable.
- For electrically powered products, a tabulation (in one place) of motor and electrical requirements if applicable
- Execution (or Construction Methods)
  - A listing of preparation steps required prior to installing Work.
  - A description of steps required to construct or install Work.
  - A tabulation of field testing required to demonstrate satisfactory construction.

Technical specifications sections will be prepared, maintained, and updated as needed.

### **Task A.1 – Specification Library Maintenance**

The City has substantially completed the core technical specification library and will balance the efforts to maintain existing standards while developing new standards as project requirements dictate. The City, with assistance from the Consultant, will edit specifications in use to address changes in codes and regulations, new product offerings, and field experience. The Consultant will support maintenance of the City standard specifications by providing the following services.

- Meet or discuss on the telephone monthly the status of the specifications library. It is expected six face-to-face meetings and six telephone calls will occur annually.
- Provide on-call telephone or email assistance in answering technical questions.
- Where directed, research construction topics, and furnish edited templates to reflect any new findings.
- Where directed, develop templates for topics not covered in current existing library.

Provide monthly email updates on revisions deemed “critical”.

The existing City Technical Specifications library to be maintained and updated includes the following specifications sections:

  - conflicts with other City-issued documents;
  - conflicts with other vetted sections;
  - conflicts with “good practice;”
  - inconsistencies in nomenclature;
  - unclear language;
  - unenforceable language; and

- clarity, misspelling, grammatical errors, and other areas where potential misunderstanding may arise.
- Identify potential conflicts noted in above task with a list of recommended action items for internal resolution by City
