Design requires clearance of 5.2m (17-ft) over normal courts, 5.8m (19-ft) over foam pit and 7m (23-ft) over performance area. Alert us now of height deficiency.

Normal installation requires reasonably flat concrete floor of 10cm (4") thickness, with no embedded heating system.

Customer responsible for providing accurate building dimensions.

System design assumes construction of elevated platform and other adjoining structures occurs after trampoline installation.
