

RESOLUTION NO. 2018-100

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF CORONA, CALIFORNIA, ATTESTING TO THE VERACITY OF THE DATA CONTAINED IN THE 2017 POWER SOURCE DISCLOSURE PROGRAM ANNUAL REPORT AND ASSOCIATED POWER CONTENT LABEL FOR YEAR ENDING DECEMBER 31, 2017.

WHEREAS, the City of Corona (City), a municipal corporation, is authorized under various provisions of the California Constitution and the general laws of California (including, specifically, Article XI, section 9(a) of the California Constitution, Public Utilities Code (PUC) Section 10004, and Government Code section 39732(a) to establish, purchase, and operate a public utility to furnish its inhabitants with, among other things, electricity; and

WHEREAS, the City operates a municipal electric utility (City of Corona Department of Water and Power or DWP); and

WHEREAS, as a municipal electric utility, DWP is generally subject to the legislative and regulatory requirement applicable to local publicly owned electric utilities (POUs); and

WHEREAS, Senate Bill 1305, as amended by Assembly Bill 162, requires retail suppliers of electricity to disclose its sources of energy being used to the California Energy Commission (CEC) and to consumers in the form of the Power Source Disclosure Program Annual Report and the Power Content Label; and

WHEREAS, the 2017 Power Source Disclosure Program Annual Report and Power Content Label have been submitted to the CEC, and the Power Content Label has been posted on the City's website for consumers to review; and

WHEREAS, the 2017 Power Source Disclosure Program Report includes attestation from the Administrative Manager of DWP, an authorized agent of the DWP, under penalty of perjury, confirming the accuracy of the information provided.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Corona, California, as follows:

Section 1. The City Council hereby approves the submission to the CEC of an attestation of the veracity of the 2017 Power Source Disclosure Program Annual Report and Power Content Label, attached to this Resolution as Exhibit A (incorporated herein by reference).

Section 2. The City Clerk shall certify to the adoption of this Resolution.

Section 3. This Resolution shall take effect immediately upon its adoption.

PASSED, APPROVED AND ADOPTED, this 5th day of July, 2018.

Mayor of the City of Corona, California

INTRODUCTION

Each worksheet, with the exception of the Attestation, is identified by a schedule number and a title that describes the information to be entered. Power Source Disclosure Program participants are only required to submit schedules that are relevant to their role. If you need to report as a power pool, please use Schedules 3 and 4 found on the PSD webpage: <http://www.energy.ca.gov/pcl/>

The following schedules are required for load serving entities:

Schedule #	Schedule Name
1	Power Procurements and Retail Sales
2	Annual Power Content Label Calculation
N/A	Attestation

INSTRUCTIONS

Schedule 1: Power Procurements and Retail Sales

This worksheet is provided for entering information about all power purchases that were used to support one electric service product covered in this filing. **If a load serving entity offers multiple electric service products, it must submit additional reports and attestations for each additional product.** Insert additional rows as needed. At the bottom of the sheet, provide the annual sales to retail consumers.

Specified Purchases: A Specified Purchase refers to procured electricity that is traceable to a specific generating facility. If a purchase was for unbundled Renewable Energy Credits (RECs) include the term "REC Only" in parentheses after the facility name in the Facility Name column, and categorize the power as the resource type of the generating facility from which the unbundled REC was derived. Electricity from Renewables Portfolio Standard (RPS) eligible facilities that has been stripped of its RECs should be categorized as "unspecified power." For specific purchases, include the following information for each line item:

- Facility Name - Provide the name used to identify the facility. For unbundled RECs, include the term "REC Only" in parentheses after the facility name .
- Unit Number - Provide the unit number if a facility has multiple generators that have been assigned unique identification numbers.
- Fuel Type - Provide the resource type (solar, natural gas, etc.) that this facility uses to generate electricity.
- Location - Provide the state or province in which the facility is located.
- Identification Numbers - Provide at least one identification number from either WREGIS, the Energy Information Agency (EIA ID), or the Federal Energy Regulatory Commission (FERC QF ID). If a purchase cannot be traced to a specific facility and therefore cannot provide a specific identification number, it must be categorized as an Unspecified Source of Power (see instructions below).
- RPS ID - Provide the RPS ID of the facility.
- Gross Megawatt Hours Procured - Provide the quantity of electricity procured in MWh from the generating facility.
- Megawatt Hours Resold or Consumed - Provide the quantity of generation resold at wholesale or self-consumed.
- Net Megawatt Hours Procured - Provide the quantity of generation procured minus resold and consumed electricity.

Unspecified Sources of Power: This refers to any purchase not traceable to specific generation sources by any auditable contract trail or equivalent, such as a tradeable commodity system (e.g., power purchased from the wholesale market such that the generating facility cannot be identified), or to power purchases from a transaction that expressly transferred energy only and not the RECs associated from an RPS-eligible facility. For these purchases, if the seller's name is unknown, please indicate "Unspecified Power" as the Facility Name in Schedule 1. For unspecified sources of power, include the following information for each line item:

- Facility Name - Provide the seller of electricity or enter "unspecified" in the facility name field
- Megawatt Hours Procured - Provide the quantity of electricity procured in MWh.
- Megawatt Hours Resold or Consumed - Provide the quantity of generation resold at wholesale or self-consumed.
- Net Megawatt Hours Procured - Provide the quantity of generation procured minus resold and consumed electricity.

Schedule 2: Power Content Label Calculator (for Load Serving Entities)

This schedule is an automated worksheet that uses the information from Schedule 1 to calculate the power content, or resource mix, for each electric service product. The percentages column contains a formula that will proportionally reduce each non-renewable category in order to reconcile any discrepancies between total net purchases and total retail sales (these discrepancies generally arise due to the reporting of unbundled REC purchases). The percentages calculated on this worksheet should be used for your Power Content Label.

Attestation (for Load Serving Entities)

This template provides the attestation that must be submitted with the Annual Report to the Energy Commission, stating that the information contained in the applicable schedules is correct and that the power has been sold "once and only once to retail consumers." For the electronic copy of this filing, fill out the information then print, sign, and scan the document. This attestation must be included in the package that is transmitted to the Energy Commission. Please provide the annual report and attestation in PDF format and the annual report in an excel file.

SCHEDULE 1: POWER PROCUREMENTS AND RETAIL SALES
For the Year Ending December 31, 2017
Applicable to: Load Serving Entities

INSTRUCTIONS: Enter information about power procurements supporting all electricity products for which your company is filing the Annual Report. If you need additional rows, add them from the INSERT menu. Please list all procurements (Specified and Unspecified purchases) as line items under the Facility Name heading. If a procurement was for unbundled REC's include the term "REC Only" in parentheses after the facility name in the Facility Name column, and categorize the power as the fuel type of the generating facility from which the unbundled REC was derived. If procured power was from a transaction that expressly transferred energy only and not the REC's associated with that energy, identify the power as "Unspecified Power" in the Fuel Type column.

ANNUAL REPORT TO THE CALIFORNIA ENERGY COMMISSION:
Power Source Disclosure Program
For the Year Ending December 31, 2017
SCHEDULE 2: ANNUAL POWER CONTENT LABEL CALCULATION
Applicable to: Load Serving Entities

INSTRUCTIONS: Total specific purchases (by fuel type) and enter these numbers in the first column. Null power purchases should be included with Unspecified Power. REC only purchases should be included as part of the fuel type they represent. Total retail sales information from Schedule 1 will autopopulate on this schedule. Any difference between total net purchases and total retail sales will be applied pro-rata to each non-renewable fuel type. Each fuel type total will then be divided by retail sales to calculate fuel mix percentages.

	Net Purchases (MWh)	Percent of Total Retail Sales (MWh)

Power Source Disclosure Program

For the Year Ending December 31, 2017

ATTESTATION FORM

Applicable to: All participants in the Power Source Disclosure Program

I, Curtis Showalter, Administrative Manager IV, declare under penalty of perjury, that the statements contained in Schedules 1 and 2 are true and correct and that I, as an authorized agent of Corona Department of Water and Power, have authority to submit this report on the company's behalf. I further declare that the megawatt-hours claimed as specific purchases as shown in these Schedules were, to the best of my knowledge, sold once and only once to retail consumers.
