Pursuant to California Government Code Section 65400, Annual Progress Reports (APR) regarding the City's adopted Housing Element must be made to the California Department of Housing and Community Development (HCD) by April 1, 2019. Each year the report covers the period of the preceding calendar year. Compliance with this reporting requirement enables the City to apply for various types of grant funding that could be available through the state.

HCD has implemented an online reporting system for jurisdictions to report their progress toward the programs contained within their Housing Elements. In the Southern California Association of Governments (SCAG) region, the 2018 reporting year is shown as Year 6 in the Fifth Housing

# File #: 19-0217

In compliance, an independent audit was conducted after the end of the fiscal year ending June 30, 2018. Said audit was approved by the governing body on December 20, 2018.

# Auditor's Responsibility

Our responsibility is to express an opinion on the Housing Successor's compliance with the California Health and Safety Code sections applicable to California Housing Successor Agencies. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in the Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred above that could have a direct and material effect on Housing Successor occurred. An audit includes examining, on a test basis, evidence about the Housing Successor's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for the Housing Successor. However, our audit does not provide a legal determination of the Housing Successor's compliance with those requirements.

### Report on Internal Control over Compliance

Management of the Housing Successor is responsible for establishing and maintaining effective internal control over compliance with the type of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the Housing Successor's internal control over compliance with the types of requirements that could have a direct and material effect on the Housing Successor to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance and to test and report on internal controls over compliance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. **Prime**Global

To the Honorable Mayor and Members of the City Council City of Corona, California

Accordingly, we do not express an opinion on the effectiveness of the Housing Successor's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance of California Health and Safety Code sections applicable to California Housing Successor Agencies on a timely basis. A material weakness in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that a material noncompliance with a type of compliance requirement of California Health and Safety Code sections applicable to California Housing Successor Agencies will not be prevented, or detected and corrected on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.
