## IMPORTANT INFORMATION ABOUT INSTALLATION RESPONSIBILITIES

The library prepares the site for the system, which includes addressing the following as outlined in the flex AMH Contractor Package:

- Library notifies bibliotheca in advance if installation is taking place before library receives their Certificate of Occupancy from the general contractor. Additional requirements may apply.
- Prior to beginning construction activities, you must confirm with the bibliotheca AMH Project Manager that no special installation requirements apply to the installation.
- Installing electrical service & network connections according to the requirements listed in [Electrical and Network requirements](#) on page 15.
- Ensuring compliance with the environmental requirements listed in [Environmental and Technical Information](#) on page 20-21.
- Preparing wall(s) for system installation:
  - For automated patron induction-based systems as described in [Wall Opening Preparation](#) on page 16. See Note below.
  - For bulkSeparator system as instructed in the bookdrop manufacturer's installation guide.

**Note: This system requires an opening that complies exactly with the dimensions listed on page 16. If you plan to finish the opening, the rough opening must be large enough to accommodate the finished materials and still maintain the dimensions.**

- The library completes finish work, such as touch-up repair of minor surface damage, drywall taping and sanding, paint or wallpaper, baseboard, etc., **after system installation is complete.**
