PLANNING AND HOUSING COMMISSION STAFF REPORT

DATE: 7/12/2021

TO: Honorable Chair and Commissioners

FROM: Community Development Department

APPLICATION REQUEST:

CZ2020-0002: Change of Zone 2020-0002 is an application to change the zoning on 17.02 acres from Agricultural to Multiple Family Residential on 8.07 acres and to General Commercial on 8.95 acres located on the southwest side of Foothill Parkway across from the intersection at Chase Drive. (Applicant: Chris Bowen, GF Investments, Inc.)

RECOMMENDED ACTION:

That the Planning and Housing Commission recommend APPROVAL of CZ2020-0002 to the City Council, based on the findings contained in the staff report.

PROJECT SITE SUMMARY

Area of property: 17.02 acres

Existing General Plan: Low Density Residential (LDR, 3 to 6 du/ac)

Proposed General Plan: Medium Density Residential (MDR, 6-15 du/ac) on 8.07 acres and General Commercial (GC) on 8.95 acres

Existing zoning: Agriculture

Proposed zoning: R-3 (Multiple Family Residential) & C-3 (General Commercial)

Existing land use: Vacant

Proposed land use: Residential and Commercial

Surrounding land uses:

S: Plant Nursery

N: Vacant

E: Foothill Parkway with residential beyond

W: Vacant

BACKGROUND

Change of Zone 2020-0002 (CZ2020-0002) is part of the Skyline Village mixed use project that includes residential and commercial on 17.02 acres located on Foothill Parkway across from the intersection at Chase Drive. The project site consists of two vacant parcels that are planned to be developed as a mixed-use village concept consisting of 78 residential condominiums on 8.07 acres at the rear of the project site and various retail and service type uses on 8.95 acres located at the front near Foothill Parkway. In addition to CZ2020-0002, the proposed development requires several development related applications to allow the land uses planned for the project. The additional applications being reviewed in conjunction with CZ2020-0002 include:

- **General Plan Amendment 2020-0003:** GPA2020-0003 proposes to amend the General Plan land use designation of 17.02 acres from Low Density Residential (3 to 6 dwelling units to the acre) to Medium Density Residential (6 to 15 dwelling units to the acre) on 8.07 acres and to General Commercial on 8.95 acres.
- **Tentative Tract Map 37691:** TTM 37691 proposes to subdivide 17.02 acres into two lots for condominium purposes for the commercial and residential land uses planned on the 8.95 acres in the C-3 zone and on the 8.07 acres in the R-3 zone.
- **Precise Plan 2020-0005:** PP2020-0005 is for the review of 25,715 square feet of commercial/retail and food space on 8.95 acres in the C-3 zone.
- **Conditional Use Permit 2020-0001:** CUP2020-0001 is to establish 78 residential condominiums on 8.07 acres in the R-3 zone.

Infrastructure Committee

The applicant initiated a conceptual development proposal on the project site in 2019. The project was initially discussed at the Infrastructure Committee at its meeting on February 6, 2019. The project at that time was entirely commercial on the project site and included a three-story Class A office building, grocery store, farmers market, restaurants, retail and commercial service spaces, and a gas station. The plan also included outdoor space for events. The Committee commented that noise and glare from lighting would need to be addressed should the development move forward and that connectivity to nearby trails from the project site should be maintained. The Committee also encouraged community outreach with the Orchard Glen residents to the south of the project

site and with the residents located near Chase Drive across from Foothill Parkway. The Committee was receptive to the conceptual proposal.

The Infrastructure Committee at its meeting on December 2, 2020, was provided an update on the potential development of the project site, which involved changes since the previous meeting. The revised proposal included 78 condominiums with over 27,000 square feet of commercial and retail space plus a food hall and outdoor dining. The Committee expressed general support for the project.

PROPOSED CHANGE OF ZONE

The project site is 17.02 acres and zoned Agricultural. The Agricultural zone is normally for growing food crops or plant nurseries with limited residential. The project is proposing to establish 78 residential condominiums on 8.07 acres, which is not allowed in the Agricultural zone. To allow the residential condominiums at the density proposed by the applicant, a change of zone to the R-3 (Multiple Family Residential) zone is required. The change of zone is also being done in conjunction with an amendment to the General Plan land use plan. The project site's current General Plan is Low Density Residential (LDR) which allows residential development ranging from 3 to 6 dwelling units to the acre (du/ac). The residential density proposed for the project is 9.66 du/ac, which requires an amendment to the Medium Density Residential (MDR) designation. The MDR designation allows a residential density range of 6 to 15 du/ac, which adheres to the density of the project.

The project also includes retail and service type commercial land uses on 8.95 acres which is not allowed by the Agricultural zone. Therefore, to allow the commercial uses proposed for the project, the applicant is proposing to change the zone on 8.95 acres to the C-3 (General Commercial) zone. The General Plan is also being amended from LDR to General Commercial to accommodate the proposed commercial uses.

Site Surroundings

The general surroundings of the project site include Foothill Parkway to the northeast, and other properties zoned Agricultural and R-1-7.2 (Single Family Residential, 7,200 square foot minimum lot size) with pockets of properties near the site zoned Open Space (OS). The properties zoned OS are owned by the US Forest Service. An existing single family residential development consisting of 157 houses exist south of the project site. A residential subdivision named Skyline Heights was approved in 2017 and covers 291 acres near and adjacent to the project site. Skyline Heights consists of 292 residential lots and 96 acres of natural open space. Skyline Heights is not yet constructed but is zoned R-1-7.2.

On the other side of Foothill Parkway across from the project site is existing single family residential. The zoning of the properties is R-1-7.2 and R-1-9.6.

ENVIRONMENTAL ANALYSIS:

Per Section 15070 of the State Guidelines for Implementing the California Environmental Quality Act (CEQA) and Section 6.02 of the City's Local Guidelines, a Mitigated Negative Declaration was prepared for the project because the Initial Study identified that the project's potentially significant effects to the environment are capable of being mitigated to less than significant. Therefore, based on the project mitigation measures identified in the Mitigated Negative Declaration, there is no

substantial evidence, in light of the whole record before the City, that the project may have a significant or potentially significant effect on the environment. The Mitigation Negative Declaration is recommended for adoption (Exhibit 5).

FISCAL IMPACT

The applicant has paid the applicable application processing fees for this project.

PUBLIC NOTICE AND COMMENTS

A 20-day public notice was mailed to all property owners within a 500-foot radius of the project site, as well as advertised in the Sentinel Weekly News and posted at the project site. As of the preparation of this report, the Community Development Department received a response from Mr. Bu Lee who is the owner of the three vacant properties that are landlocked behind the project site to the west and southwest. Mr. Lee voiced his concerns regarding the access road that the applicant is proposing to construct on the project site in order to provide access from Foothill Parkway to Mr. Lee's properties. The access road is located along the southerly perimeter of the project site. The road not only provides access to Mr. Lee's properties, but it also provides access to the abutting nursery to the south and serves as an emergency fire access for the project site. The road width ranges from 12 feet to 28 feet. The easterly portion of the road extending from Foothill Parkway to the commercial parking lot is 28 feet wide. The portion that extends to the nursery is 20 feet wide. From the nursery access point to Mr. Lee's properties the road is 12 feet wide. Mr. Lee stated to staff that he would like the developer to provide him a wider road to accommodate two-way access.

STAFF ANALYSIS

The below table identifies the consistency of CZ2020-0002 to several of the goals and policies in the General Plan.

Corona General Plan Goals and Policies	Project Consistency
Goal LU-7. Residential neighborhoods that contain a diversity of housing and supporting uses to meet the needs of Corona's residents and that are designed to enhance livability and a high quality of life.	The zone change promotes medium density residential housing, which allows housing types that are different from the mostly developed single family homes in the immediate area and thereby provides housing opportunities to Corona's residents.
Policy LU-7.2. Promote the development of innovative forms of housing that increase the diversity and affordability of units to meet the needs of the population, such as mixed-use that integrate housing with commercial and other uses, live/work structures, loft housing, and other similar housing types.	The zone change allows for housing that would meet the needs of certain population and provides opportunity for commercial services to be within walking distance to residential neighborhoods.

Policy LU-7.4 Allow for the integration of land uses within residential neighborhoods that support and are complementary to their primary function as living environments, including but not limited to: schools, parks, trails, community centers, community meeting facilities, and other comparable uses that provide supporting services.	The zone change promotes residential and non-residential land uses to be integrated and provides Corona residents with leisure opportunities in proximity to housing instead of having to travel elsewhere.
Goal LU-9. Development of new residential neighborhoods that complement existing neighborhoods, contain a mix of neighborhood-supportive land uses, exhibit high quality architectural design, and ensure a high level of livability for their residents.	The zone change would allow new residential development and neighborhood supportive land uses, which is required to adhere to adopted development standards and design standards that are intended to promote orderly and high-quality development.
Policy LU-9.3. Encourage the integration of a mix of housing types into new residential neighborhoods, which may include single-family homes, townhomes, row houses, live-work, and multi-family units to the extent the integration is appropriate and complements surrounding land uses.	The zone change provides opportunity for new housing types within an area that is predominately single family and thereby encourages an integration of housing types into the neighborhood.
Goal H-1. Provide and maintain a balance of housing types and corresponding affordability levels to provide for the community's demands for housing within all economic segments of the City.	The zone change provides people within certain income segments an opportunity for housing based on affordability.
Policy H-1.3. Provide sites for residential development so that scarcity of land does not unduly increase the cost or decrease the availability of housing for all segments of the community.	The zone change maintains land within the city that would provide an opportunity for housing and at a higher density than its current density under the General Plan.

CZ2020-0002 also establishes consistency with the General Plan designations proposed by GPA2020-0003 for the project site, which includes Medium Density Residential on 8.09 acres being rezoned to R-3 and General Commercial on 8.95 acres being rezoned to C-3.

FINDINGS FOR APPROVAL OF CZ2020-0002

1. An initial study (environmental assessment) has been conducted by the City of Corona so as to evaluate the potential for adverse environmental impacts. The initial study identifies potentially significant effects on the environment, but:
 - a. *The project applicant has agreed to revise the project to avoid these significant effects or to mitigate the effects to a point where it is clear that no significant effects would occur, as reflected in the Conditions of Approval attached as Exhibit4.*

- b. There is no substantial evidence before the City that the revised project may have a significant effect.*
2. The proposed change of zone is in conformity with the General Plan map and text for the following reasons:
 - a. The General Plan land use plan of the project site is being amended to Medium Density Residential on 8.09 acres and General Commercial on 8.95 acres via GPA2020-0003, which is consistent with the placement of the R-3 zone and C-3 zone on the project site.*
 - b. The zone change promotes medium density residential housing, which allows housing types that are different from the mostly developed single family homes in the immediate area and thereby provides housing opportunities to Corona's residents. This is consistent with Goal LU-7.*
 - c. The zone change allows for housing that would meet the needs of certain population and provides opportunity for commercial services to be within walking distance to residential neighborhoods. This is consistent with Policy LU-7.2.*
 - d. The zone change promotes residential and non-residential land uses to be integrated and provides Corona residents with leisure opportunities in proximity to housing instead of having to travel elsewhere. This is consistent with Policy LU-7.4.*
 - e. The zone change would allow new residential development and neighborhood supportive land uses, which is required to adhere to adopted development standards and design standards that are intended to promote orderly and high-quality development. This is consistent with Goal LU-9.*
 - f. The zone change provides opportunity for new housing types within an area that is predominately single family and thereby encourages an integration of housing types into the neighborhood. This is consistent with Policy LU-9.3*
 - g. The zone change provides people within certain income segments an opportunity for housing based on affordability. This is consistent with Goal H-1*
 - h. The zone change maintains land within the city that would provide an opportunity for housing and at a higher density than its current density under the General Plan. This is consistent with Policy H-1.3.*
3. The subject property is suitable for the uses permitted in the R-3 and C-3 zones in terms of access, size of parcel, relationship to similar or related uses, for the following reason:
 - a. The project site is able to meet the development standards required by the R-3 and C-3 zones, which is demonstrated by the project's conditional use permit (CUP2020-0001) application for the residential plan proposed in the R-3 zone and the precise plan (PP2020-*

0005) application for the commercial plan proposed in the C-3 zone. The project site also has adequate access from Foothill Parkway.

4. The proposed change of zone is necessary and proper at this time, and is not likely to be detrimental to the adjacent property or residents for the following reasons:
 - a. *The project as proposed by the development applications being processed in conjunction with the change of zone request demonstrates the change of zone is necessary at this time to complete the entitlement for residential and commercial land uses on the project site.*
 - b. *Development occurring in the R-3 zone and C-3 zone is required to adhere to the development standards adopted by the Corona Municipal Code to ensure development is orderly and that the necessary infrastructure is in place to support the land uses allowed by the zoning.*
5. The proposed change of zone is in the interest of the public health, safety, necessity, convenience and general welfare and in accordance with good zoning practice for the following reason:
 - a. *The proposed zoning designations are consistent with several goals and policies of the City's General Plan, which is used as the foundation in making land use decisions.*
